Art Unit: 2834

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, drawn to a piezoelectric acoustic, transducer classified in class 310, subclass 324.
- II. Claims 11-20, drawn to a method of manufacturing a piezoelectric device, classified in class 29, subclass 25.35.

The inventions are distinct, each from the other because:

Inventions Group I and Group II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the piezoelectric device of Group I can be made by methods other than those of Group II, e.g. both the first and second elastic adhesives could be placed and cured prior to providing the conductive adhesive.

Applicant has provided evidence in this file showing that the invention was owned by, or subject to an obligation of assignment to, the same entity as *** at the time this invention was made. Accordingly, *** is disqualified as prior art through 35 U.S.C. 102(f) or (g) in any rejection under 35 U.S.C. 103(a) in this application. However, this applied art additionally qualifies as prior art under another subsection of 35 U.S.C. 102 and accordingly is not disqualified as prior art under 35 U.S.C. 103(a).

Applicant may overcome the applied art either by a showing under 37 CFR 1.132 that the invention disclosed therein was derived from the invention of this application,

Art Unit: 2834

and is therefore, not the invention "by another," or by antedating the applied art under 37 CFR 1.131.

Claim*** rejected under 35 U.S.C. 103(a) as being unpatentable over *** as applied to claim*** above, and further in view of ***.
